

Installation Instruction

1. Water: It needs two water-galvanized pipes. One is for cold water, the other for hot water. And they should be set on wall, 350mm above from ground. And a device for cutting water should be placed on wall.

2. Power: The power should be 220V/50Hz, single-phase, 10Amp. The socket should be the waterproof, which is designed especially for bathroom and it should be placed 350mm above of ground.

3. Drain: The drain-pipe, which radius is within 0 to 40mm, should be set on at the centre of the drain.
